TELESCOPE EXPERIENCE AND OBSERVING PROPOSALS

Feb 2023 – Sept 2024

AMI-LA Telescope Operator

MRAO, UNIVERSITY OF CAMBRIDGE

Primary scheduler for the AMI-LA (Arcminute Microkelvin Imager – Large Array) telescope at MRAO (Mullard Radio Astronomical Observatory) Cambridge, UK. Responsible for ensuring that the telescope is observing the most appropriate targets at any given time for a given science goal and ensuring the telescope is running efficiently. Also responsible for selecting new transients to observe that align with the Oxford transient research group's science goals and subsequently perform data reduction and interpretation of the observations.

Telescope Scheduler

Scheduled radio observations with MeerKAT and the Karl G. Jansky Very Large Array. Trained to observe with the Australia Telescope Compact Array and Effelsberg 100m telescopes. Experience reducing data for all aforementioned facilities as well as NOEMA. At optical frequencies, have scheduled observations on the pt5m in La Palma and with ULTRACAM (a fast photometer) on the NTT.
